100% reliable, Tronic water heaters have sleek exteriors that only complement their performance. With a unique porcelain enamel tank, Tronic water heaters not only provide excellent heating, but also last really long and utilise much less energy than ordinary water heaters. For a unique bathing experience, look no further than Tronic.

Porcelain Enamel Glass Lined Tank: Manufactured in a modern, automated plant using European Technology. The enamel coating is fired at 850°C to fuse and bond with the inner tank. Protects the tank from rust and corrosion.

8 bars: Highest pressure rating of 8 bars for use in multistorey buildings or with pressure pumps

Glass lined Incoloy 800 Element: Withstands temperatures up to 1000°C. Long lasting, even in hard water.

Sacrificial Magnesium anode: A special device to enhance the corrosion protection of the tank by means of "Cathodic action".

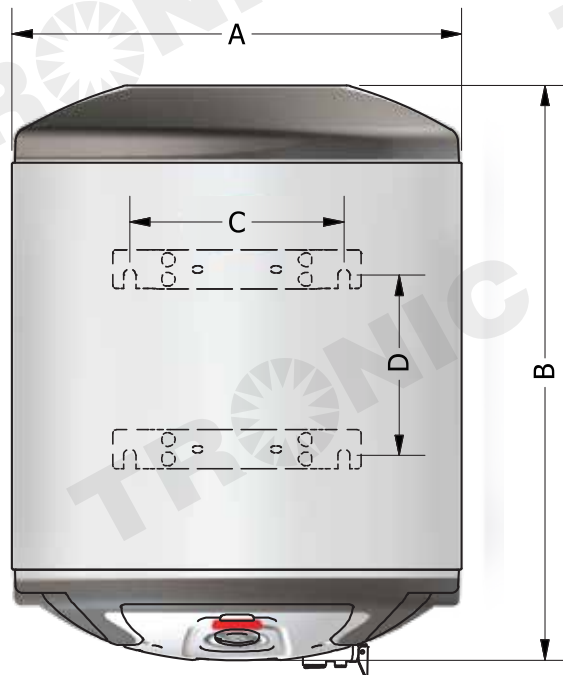

Rust Proof Lids: Made from PP in a contemporary design

PUF insulation: 3 cm Extra thick (PUF) Insulation keeps the water hot for a much longer time and reduces energy consumption.

Max Safety: Automatic Thermostat, Multifunction safety valve and thermal cutout ensure protection from overheating, dry heating and high pressure.
